

PROJECT DESIGN PHASE II

REQUIREMENT ANALYSIS

DATE	02 Nov 2023
TEAM ID	6CA770FDBD1BFD488A34FCBDBFC19CE7
PROJECT NAME	Creation of an application for school management

Requirement analysis:

Requirements analysis is a vital step in the development of a school management system. It involves a systematic approach to gathering and documenting the needs and expectations of various stakeholders, including school administrators, teachers, students, parents, and regulatory bodies. By engaging with these key players, one can uncover essential features and functionalities required for efficient school operations. These requirements are categorized into administrative, teacher, student, and parent needs, encompassing elements such as enrollment processes, academic planning, communication tools, and compliance with educational regulations. Careful prioritization of these requirements is crucial, distinguishing must-have features from nice-to-haves. Proper documentation, validation, and verification are essential to ensure accuracy and alignment with stakeholder needs, ultimately laying a solid foundation for the development of a robust and effective school management system.
