| Team Id | 6CA770FDBD1BFD488A34FCBDBFC19CE7 |
| Project Name | Creation of application for school management |

Empathy map:

Creating an empathy map can help you better understand the needs, thoughts, and feelings of the various stakeholders involved in the development and use of a school management application.

Analyzing empathy maps for these key user personas will provide valuable insights into their needs, pain points, and desires, helping in the development of a more user-centric school management application.

The Empathy map On Our Project is below:
